Summary

As an experienced software engineer, I specialize in front-end development and full-stack engineering. I excel in utilizing ReactJS, Next.js, and TypeScript to create exceptional web applications. My expertise also extends to implementing robust test processes to ensure high-quality deliverables. Throughout my career, I've successfully led development projects and mentored teammates. I'm deeply passionate about innovation, problem-solving, and continuously expanding my skills in the dynamic tech industry.

Experience

Frontend Developer

Blissbook

Jun 2023 - Present (10 months)

As a Frontend Developer at Blissbook, I handle the following tasks:

- I lead the creation of new projects UI using the latest technologies and components, focusing on delivering top-notch code and an improved user experience.
- Maintain the current project by adding tested features and making improvements to the code quality.
- Assist in defining and refining the workflow structure, implementing effective routines, and conducting project reviews to improve productivity.
- Contribute to maintaining strict code review processes, ensuring adherence to high-security standards, excellent code quality, and strong design principles.

Software Engineer

Media Contactless

Sep 2020 - Jun 2023 (2 years 10 months)

- Creating complex processes to enable users and customers to launch various campaigns targeted at users' customers, considering their information, location, and product accessibility.
- Building robust internal and external platforms to manage and distribute resources for purchasing, connecting, and configuring NFC chips or QR codes.
- Conducting code reviews and ensuring the overall code quality of the team's work.
- Writing code and configuring different aspects of web applications across various environments and parameters.
- Developing a global platform and its design system using Yarn Workspaces.
- Designing solutions to bridge the physical and digital realms using contactless technologies.
- Conducting knowledge transfer sessions to share insights and expertise with the team.
- Guiding and mentoring new team members during their onboarding process.

Full Stack Engineer

ASIN Soluções

Mar 2020 - Aug 2020 (6 months)

- Led the development of a web application using ReactJS and NodeJS, aimed at delivering crucial tax information to clients and mitigating potential fines.
- Collaborated with stakeholders to gather requirements, implemented features, conducted thorough testing, and managed the deployment process.
- Provided guidance and mentorship to new developers, emphasizing best practices in coding and project management.
- Conducted regular code reviews and fostered a collaborative environment among team members.

Frontend Developer
Sistema Prodígio de Ensino
Jun 2019 - Mar 2020 (10 months)
- Developing a JavaScript-based web application using ReactJS/WordPress, facilitating user access to study platforms and feedback mechanisms for tests and university entrance exams.
- Spearheaded the planning and management of various phases in the software development life cycle.
- Offering technical leadership to team members through coaching and mentorship, ensuring collective growth and proficiency in project execution.

Education

Rocketseat
Certification: NodeJS, ReactJS e React Native, Computer Software Engineering
2019 - 2021

Licenses & Certifications

Webpack from basic to advanced + Project and Micro-frontend - Udemy
UC-4dae3945-6335-41ba-a47b-c85f4c2c416a

Skills

Apollo GraphQL • Prisma ORM • Jest • Playwright • OpenAI • TipTap • Figma (Software) • NextJS • Web Application Development • Front-End Design
