Guilherme Moraes

Senior Software Engineer @Resquared | React, TypeScript,
Automated tests, TailwindCSS
Rio de Janeiro, Rio de Janeiro, Brazil

Summary

I've been a professional Senior Frontend Developer since 2019, with experience in both B2B and B2C platforms. I'm passionate about delivering top-notch experiences for users and teammates by leveraging the established techniques and latest technologies (such as ReactJS, Next.js, and TypeScript), along with my empathy.

I have worked on complex projects and created solutions using server-side rendering, cache request strategies, and robust, reliable testing processes. I maintain strict code review standards and have led development teams.

I love creating simpler solutions and explaining them in just a few words while also documenting the entire process—covering not only the technical aspects but also the thoughtful process behind them. I'm always eager to learn new skills and explore challenges in dynamic industries.

Experience

Resquared
Senior Frontend Engineer
December 2024 - Present (1 year 1 month)
United States

GlobalPassport™
9 months

Tech lead
June 2024 - December 2024 (7 months)
United States

- Lead the software development team;
- Participate in the new features and projects design;
- Implement strategies, validate results, review code, and create tasks

Senior Software Engineer

April 2024 - December 2024 (9 months)

United States

- Develop and maintain sophisticated front-end features for our web applications, focusing on a seamless user experience.
- Craft efficient and maintainable styling using Tailwind CSS.
- Design reusable components, prioritizing code modularity and reusability.
- Implement best coding practices and contribute to our version control using Git within a Monorepo environment.
- Drive the creation of an AI-powered chatbot, enhancing user interactions and automating complex processes.

Blissbook

Senior Frontend Developer

June 2023 - March 2024 (10 months)

United States

As a Frontend Developer at Blissbook, I handle the following tasks:

- I lead the creation of new projects UI using the latest technologies and components, focusing on delivering top-notch code and an improved user experience.
- Maintain the current project by adding tested features and making improvements to the code quality.
- Assist in defining and refining the workflow structure, implementing effective routines, and conducting project reviews to improve productivity.
- Contribute to maintaining strict code review processes, ensuring adherence to high-security standards, excellent code quality, and strong design principles.

Media Contactless

Senior Software Engineer

September 2020 - June 2023 (2 years 10 months)

Switzerland

- Creating complex processes to enable users and customers to launch various campaigns targeted at users' customers, considering their information, location, and product accessibility.
- Building robust internal and external platforms to manage and distribute resources for purchasing, connecting, and configuring NFC chips or QR codes.
- Conducting code reviews and ensuring the overall code quality of the team's work.
- Writing code and configuring different aspects of web applications across various environments and parameters.

- Developing a global platform and its design system using Yarn Workspaces.
- Designing solutions to bridge the physical and digital realms using contactless technologies.
- Conducting knowledge transfer sessions to share insights and expertise with the team.
- Guiding and mentoring new team members during their onboarding process.

ASIN Soluções

Full Stack Engineer

March 2020 - August 2020 (6 months)

Belo Horizonte, Minas Gerais, Brazil

- Led the development of a web application using ReactJS and NodeJS, aimed at delivering crucial tax information to clients and mitigating potential fines.
- Collaborated with stakeholders to gather requirements, implemented features, conducted thorough testing, and managed the deployment process.
- Provided guidance and mentorship to new developers, emphasizing best practices in coding and project management.
- Conducted regular code reviews and fostered a collaborative environment among team members.

Sistema Prodígio de Ensino

Frontend Developer

June 2019 - March 2020 (10 months)

Barra da Tijuca, Rio de Janeiro - Brasil

- Developing a JavaScript-based web application using ReactJS/WordPress, facilitating user access to study platforms and feedback mechanisms for tests and university entrance exams.
- Spearheaded the planning and management of various phases in the software development life cycle.
- Offering technical leadership to team members through coaching and mentorship, ensuring collective growth and proficiency in project execution.

Assistec Informática LTDA

Support Analyst level 2

February 2014 - June 2019 (5 years 5 months)

Duque de Caxias, Rio de Janeiro, Brazil

Sonda Procwork
